PEO STRI PRIORITIES

Strengthen collaboration with partners and stakeholders.

Transform with new technologies that modernize capabilities.

Rapidly deliver outcomes with agility and acquisition streamlining.

Invest in our people through professional development and growth opportunities.

VISION

The leader in delivering unmatched testing, training and information operations capabilities to enhance operational readiness in support of our national defense.

MISSION

Rapidly develop, deliver and sustain testing, training and information operations capabilities to enhance readiness across the operational spectrum.

Digital Integration Lab (DIL)

Provides a secure and centralized location for all PEO STRI programs to integrate with Army Mission Command & Information Systems (MCIS). It also provides a critical risk reduction capability in preparation for formal Army Interoperability Certification (AIC) testing by supporting the Project Managers' (PMs') software development and integration initiatives across PEO STRI.

- Primary place of performance is Research Park area in Orlando, FL
- Requires qualified MCIS staff and must meet current cyber security requirements
- Simulation to C4I Interoperability (SIMCI)
- Provides experimentation, integration, testing, certification, demonstration and training for MCIS domain
- Auxiliary test site for the Central Technical Support Facility (CTSF) to conduct distributed AIC testing
- A Federated Net-Centric Site (FaNS)
- Government Furnished Property (hardware/software) and Government provided workspace and furniture
- Virtualization - Support efforts to virtualize the MCIS assets, to create efficient configuration/reconfiguration in support of each MCIS baseline.

One Semi-Automated Forces (OneSAF)

Constructive simulation that models platforms, systems, and U.S. Army doctrine at the Brigade and Below levels. It is used within JLCCTC and LVC-IA.

- Cloud-enabled software (accessible remotely anywhere / anytime)
- Government Off-the-Shelf software
- Uses official U.S. Army data for unit composition
- Physics-based, entity modeling with validated data
- Supports Live, Constructive & Virtual (LVC) Domain Interoperability
- Bi-directional stimulation/simulation of Mission Command (MC) systems
- Enhanced cyber effects on MC messages

Reconfigurable Virtual Collective Trainer (RVCT)

The Reconfigurable Virtual Collective Trainer (RVCT) includes aviation (RVCT-A) and ground (RVCT-G) maneuver platforms, and dismounted Soldier sets that enable mission rehearsal, gunnery, and collective maneuver training. The RVCT represents a mobile, transportable, modular, and scalable training capability with the minimum hardware necessary to represent form, fit, and function to enable execution of collective tasks and essential training. This design allows RVCT modules to easily maintain concurrency at a cost significantly more affordable than the Army's legacy collective trainers while also delivering a more realistic virtual training environment that will enhance the Army's overall readiness. The RVCT architecture and design will support interoperability with the future Next Generation Constructive (NGC) and Live Training Environments, and other Synthetic Training Environments (STE) and operational capabilities.

Next Generation Constructive (NGC) Acceleration

The Army's Synthetic Training Environment (STE) Next Generation Constructive (NGC) is the future of constructive training for Division and Below Commanders and their staff. NGC will enable the Army to close command staff training gaps against near-peer threats within a Multi-Domain Operations (MDO) environment scaled through the Army Service Component Command (ASCC) level. This seamless delivery of NGC is built off the STE Software (SW) foundation to achieve Army training readiness needs.

PdM CRT Topic: Persistent Cyber Training Environment (PCTE) Cyber Innovation Challenge (CIC) #5 - PCTE-in-a-Box

Objective

- Decrease **Time** to Produce and Present Training
- Increase Training **Quality**
- Increase Training **Throughput**

Problem Statement

The need for individual and collective Cyber training in OCONUS locations continues to grow as foreign Cyber partnerships mature. USCYBERCOM has experienced issues conducting PCTE-based training in remote locations given the fact that UNCLASS and TS PCTE systems are located in the US.

Vision

PdM CRT seeks the ability to provide stable and responsive individual and collective Cyber training content, including Cyber ranges, at global locations while reducing/eliminating the logistical & financial burdens associated with horizontal expansion. Solutions will consider limited networking / bandwidth provisions available at point of need and be capable of supporting multiple classifications.

ACQUISITION STRATEGY

- PdM CRT in support of the PCTE is pursuing CIC #5 for FY26 award
- We are seeking to enhance and address PCTE training platform needs through a continued multi-vendor best-of-breed integrated capability
- Capability gaps are currently being assessed by USCYBERCOM and the program office

CURRENT CONTRACT/ORIGINAL DEVELOPER/OEM (IF RECOMPETE)

- Current contract does not exist. Future contract will be an OTA with industry
- Initial RFS will include paper submission of PCTE-in-a-Box Concept of Operations, Technical Data Package, System Architecture.

PERIOD OF PERFORMANCE

PL IMO Topic: Test Resource Management Center (TRMC) Test & Evaluation (T&E) Science & Technology (S&T) Program

T&E/S&T Program sponsors projects with Technology Readiness Levels (TRLs) 3-6. The T&E/S&T Program will accept a high degree of technical risk to fund innovations that could result in high-payoff technological advancements. The T&E/S&T Program will consider novel, unproven solutions that are deemed too risky to be adopted in current DoD T&E approaches.

Ten (10) Test Technologies are currently represented:

- High Speed Systems Test (HSST)
- Cyber Test Technologies (CTT)
- Electronic Warfare Test (EWT)
- Directed Energy Test (DET)
- Autonomy and Artificial Intelligence Test (AAIT)
- Advanced Instrumentation Systems Technology (AIST)
- Spectrum Efficiency Test (SET)
- Space Systems Test (SST)
- Nuclear Environments Test (NET)
- Command, Control, Communication, and Computer Test (C4T)

PL IMO Topic: National Cyber Range Complex (NCRC):

The NCRC: Event Planning, Operations, and Support (EPOS) IDIQ Contract supports the Test Resource Management Center (TRMC) / NCRC mission to provide realistic cybersecurity environments for T&E of major DoD acquisition programs and to enable the conduct of realistic training and certification events for the DoD Cyber Mission Force (CMF) and other operational commands.

Vision: The preferred cyber range provider leading the DoD in innovative cyber test and training technologies adaptive to multi-service/multi-domain requirements for DoD test and evaluation, training, and acquisition communities in support of the National Cyber Strategy.

Develop the TRMC/NCRC Enterprise locations (Orlando, Charleston, Pax River, Eglin) into an integrated and interoperable facilities designed to enable the planning and execution of large scale, complex, distributed cybersecurity events to satisfy customer requirements in the domains of R&D, S&T, DT&E, and OT&E.

Support Cyber Tabletops, Risk Reduction Events, Single System Events, System of Systems Events, Cyber Offensive/Defensive training, exercises, and mission rehearsal.

Encompasses the requirements and acquisition approach for the networking efforts of the following projects:

- Test Network Modernization (TNM)
- ATEC Fiber Modernization (AFM)
- Future Wireless Network (FWN)

Driving Requirements

- TNM applies enterprise solutions to replace, modernize, and protect existing ATEC test network equipment to meet evolving cyber-security and increased bandwidth requirements.
- AFM provides 6 developmental test centers and 5 operational test locations with a revitalized fiber network infrastructure to complement the TNM project by providing greater data throughput, increased reliability and redundancy.
- FWN will complement the AFM project by leveraging existing and developmental wireless capabilities to the maximum extent possible to offer greater test coverage areas.

ACQUISITION STRATEGY
