WHAT IS NTSA?

The National Training and Simulation Association brings government, academia and industry together to develop new training and simulation solutions. By organizing a variety of industry forums and association-sponsored events, NTSA provides the Modeling & Simulation community with a means of communicating the full capabilities and characteristics of training systems and mission planning while promoting their business interests in the marketplace. Additionally, NTSA manages the Certified Modeling & Simulation Professional (CMSP) program to signify individuals' knowledge and expertise within the field. As a recognized, formal organization that fosters the discussion of requirements, procurement issues and policies, NTSA builds relationships between the training industry, planners, and acquisition agencies. Accordingly, NTSA is a proud affiliate of the National Defense Industrial Association (NDIA).
